WORK EXPERIENCE

SHOPLINE LIMITED

Software Developer

June 2022 - Ongoing

- Built scalable backend systems with Java, Spring Boot, and MySQL, processing tens of thousands of daily transactions.
- Implemented 100+ RESTful APIs, enhancing efficiency and enabling seamless frontend-backend communication.
- Optimized database queries, reducing response time by 25% and improving overall system performance.

AVEVA

Walkover Software Development Internship

Jan 2022 - Mar 2022

- Boosted frontend performance, enhancing UI responsiveness and increasing user engagement.
- Developed a custom log-prioritization feature based on execution type, improving debugging efficiency by 30-40%.
- Integrated automated workflows to streamline client task progression, reducing manual effort and turnaround time.

EDUCATION

Maharasi Dayanand University

Bachelor of Technology in Computer Science - 87%

June 2018 - July 2022

PROJECTS

ExamPortal

Jan 2022 - March 2022

- Improved the authentication system by implementing JWT-based authentication and authorization, resulting in a 30% reduction in user session errors.
- Devised a comprehensive Admin Dashboard that enables efficient management of categories, real-time monitoring of user activity, and seamless download of results, increasing administrative productivity by 25%.
- Engineered a countdown Timer System that auto-submits exams on timeout, ensuring 99.9% exam integrity and reducing manual intervention by 90%.
- Enabled data persistence, filtering, and pagination, resulting in a 40% improvement in backend performance and a 20% reduction in database queries.

Dictionary Web Application

April 2019 - June 2019

- Designed a dictionary web app that fetched definitions from an external API, resulting in a 30% increase in user engagement.
- Utilized HTML, CSS, JavaScript, and Bootstrap to create a user-friendly and visually appealing interface, with a 25% reduction in bounce rate.

SKILLS

- Core Programming Languages: Java, C++, MySQL
- Web Development: Spring Boot, Microservices, RESTful API Development
- Database Management: PostgreSQL, pgAdmin, Database Design
- Security: Application Security, Secure Coding Practices, OAuth2, JWT
- Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Programming (OOP), System Design

CERTIFICATE

Infosys Certified in Springboot Professional Developer

AWARD

Praised by the Product Owner at Mercedes Benz for reliable and efficient feature implementation
